

**DUAL LINE HYDRAULIC
TRAILER
BRAKE VALVE "TVB"
"S4"**

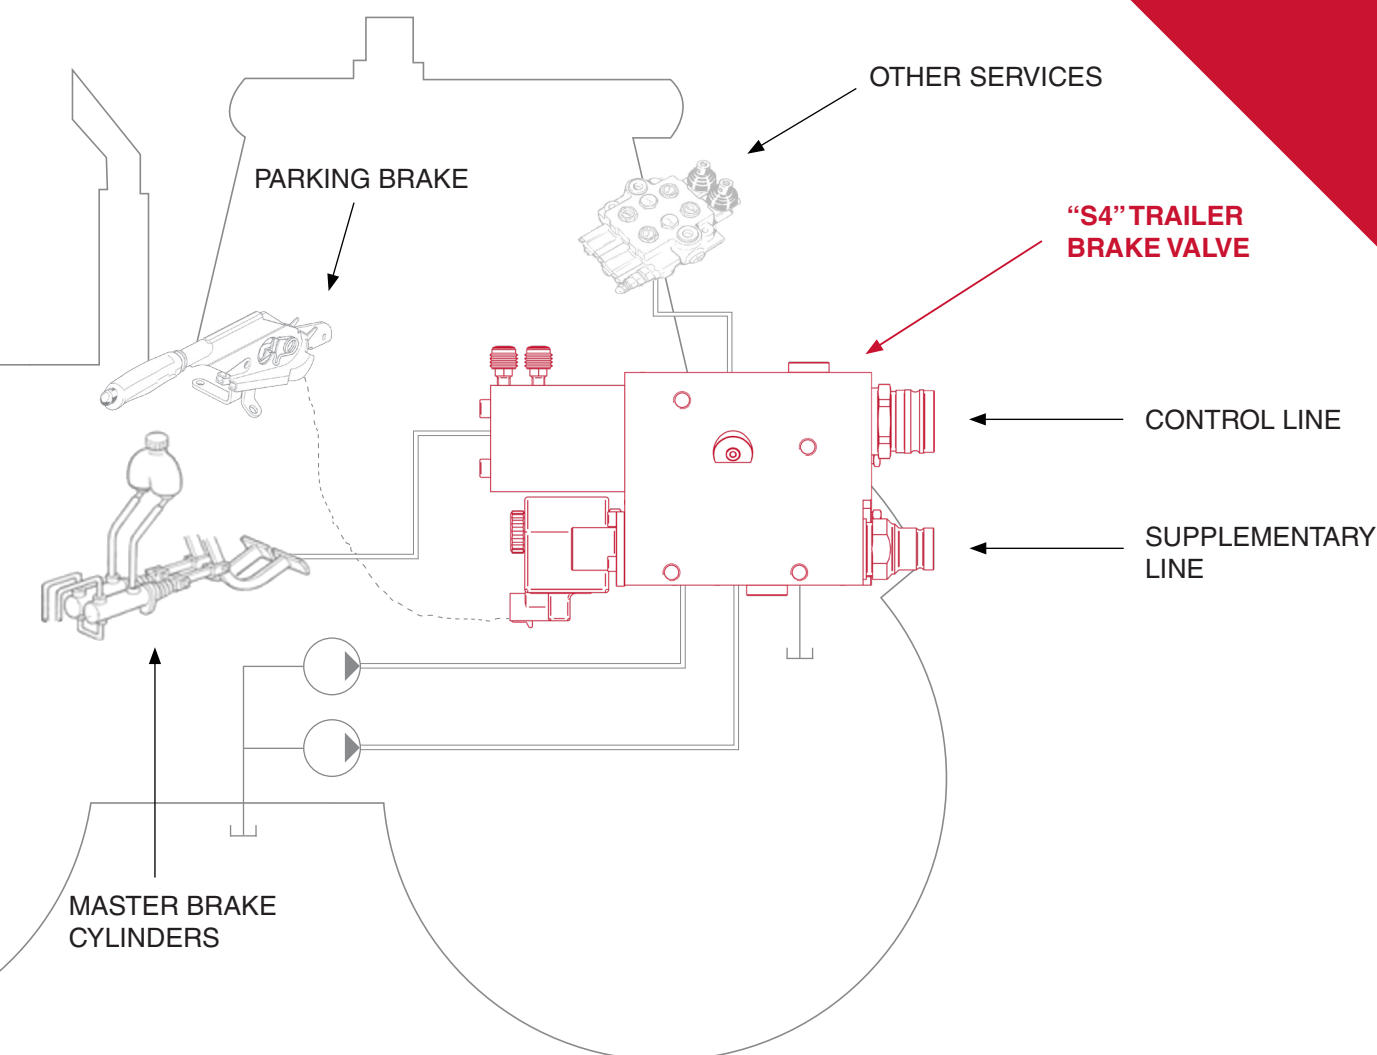

SLANZI
CREATIVE HYDRAULIC SOLUTIONS

According to the new EU 2015/68 regulation for agricultural and forestry vehicles

“S4”

APPLICATION

MAIN FEATURES

- Smart valve able to automatically adapt to the braking performance depending on the type of trailer (dual line – single line trailer) according to annex XIII RVBR EU 2015/68
- Valve can be coupled with CUNA Slanzi “SLV” adaptor according to CUNA NC 344-20 Type Approval
- Joints incorporated on the valve body
- Automatic reset of the control line in case of accidental disconnection or failure of the control line during the braking action
- Valve can be configured for open centre circuits and LS pump
- Energy saving system in case of a trailer not connected to the valve
