DUAL LINE HYDRAULIC TRAILER BRAKE VALVE

SLANZI

According to the new EU 2015/68 regulation for agricultural and forestry vehicles

“S5”

APPLICATION

MAIN FEATURES

- Smart valve able to automatically adapt to the braking performance depending on the type of trailer (dual line – single line trailer) according to annex XIII RVBR EU 2015/68
- Valve can be configured to comply with the CUNA NC-344-20 standard without the need for an external adaptor
- Automatic reset of the supplementary line in case of accidental disconnection or failure of the control line during the braking action
- Valve can be configured for open centre circuits and LS pump
- Energy saving system in case of a trailer not connected to the valve
